EDUCATION

Santa Clara University

Santa Clara, CA

Bachelor of Science in Computer Science

Jun 2025

- **Coursework:** Data Structures & Algorithms, Theory of Algorithms, Object Oriented Programming, Discrete Math, Computer Networks, Embedded Systems, Operating Systems
- **Awards & Honors:** 4th place in Hack4Humanity Hackathon (2022), Honorable Mention in INRIX Hackathon (2023), Selected as 1 of 30 startups (out of 130+) for the SCU Bronco Ventures Accelerator (2024), Chosen as 1 of 10 students (out of 100+) for the Bay FC Analytics Program (2025)
- **Extracurriculars:** Association of Computing Machinery, Tau Kappa Epsilon Fraternity (Secretary), Varsity Basketball Captain

TECHNICAL SKILLS

Languages: JavaScript, Python, Java, HTML, CSS, C++, C#, SQL

Libraries/Frameworks: React, Node.js, React Native, Tailwind CSS, AWS

Tools: Git, VS Code, Confluence, JIRA, Firebase, JUnit, Docker, LaTeX, Vercel, Postman

Certificates: [Databases in mySQL \(Meta\)](#) [Version Control \(Meta\)](#)

EXPERIENCE

Software Engineer – Engineering Development Program

Jun 2025 – Present

Travelers

Hartford, CT

- Enhanced internal tools using **React**, **TypeScript**, and **Python** to streamline quote comparisons and rate adjustments, enhancing analyst workflows and influencing pricing decisions for **thousands** of Travelers customers
- Deployed **QlikView** dashboards using **SQL Server** data and **pricing benchmark APIs** to visualize premium recommendations and support real-time pricing decisions by analysts

Software Engineer Intern

Mar 2025 – May 2025

Bay FC (NWSL)

San Francisco, CA

- Developed a **clustering tool** using **Python** and **KNN** to classify Bay FC players into archetypes, enabling data-driven evaluation by the analytics team
- Cleaned and engineered player features using **Python** to support **KNN** clustering and archetype classification

Software Engineer Intern

Jan 2025 – May 2025

Santa Clara University (Athletic Department)

Santa Clara, CA

- Built a predictive regression model using **Python** and **scikit-learn**, analyzing strength, athleticism, and efficiency metrics to forecast player performance, enabling data-driven training adjustments for **SCU D1 basketball**
- Implemented dynamic filtering, KPI tracking, and visualizations using **Dash** and **Plotly**, helping coaches assess performance, adjust training, and reduce injury risk based on player data

Software Engineer

Apr 2024 – Dec 2024

Perfect Fit (Startup)

Santa Clara, CA

- Founded and built [Perfect Fit](#), a full-stack virtual wardrobe platform using **HTML**, **React**, **Node.js**, and **Firebase** that generates tailored outfits with smooth data management and scalability
- Engineered a background removal function using **Node.js** and **Express**, simplifying the clothes uploading process

TECHNICAL PROJECTS

[The Clothes Exchange](#) | *MERN Stack (MongoDB, Express, React, Node.js), Python*

Nov 2023

- Developed an eco friendly clothing store using **MERN** stack with listing, filtering, and recommendation features
- Created a similar-item recommendation system using **Python** and **KNN** Model, resulting in personalized browsing

[Trip Planner](#) | *React, Node.js, Vercel, SQL, Google Maps & Places API*

Sep 2024 - Nov 2024

- Developed a full-stack app with real-time itinerary updates and dynamic location suggestions, reducing trip planning time to 15 minutes
- Led development in a team setting using Agile methods, UI mockups, and UML diagrams
