EDUCATION

Santa Clara University

Santa Clara, CA

Bachelor of Science in Computer Science

Jun 2025

- **Coursework:** Data Structures & Algorithms, Theory of Algorithms, Object Oriented Programming, Discrete Math, Computer Networks, Embedded Systems, Operating Systems
- **Awards & Honors:** 4th place in Hack4Humanity Hackathon (2022), Honorable Mention in INRIX Hackathon (2023), Selected as 1 of 30 startups (out of 130+) for the SCU Bronco Ventures Accelerator (2024); chosen as 1 of 10 students (out of 100+) for the Bay FC Analytics Program (2025)
- **Extracurriculars:** Association of Computing Machinery, Tau Kappa Epsilon Fraternity (Secretary), Varsity Basketball Captain

TECHNICAL SKILLS

Languages: JavaScript, Python, Java, HTML, CSS, C++, C#, SQL

Libraries/Frameworks: React, Node.js, React Native, Tailwind CSS, AWS

Tools: Git, VS Code, Confluence, JIRA, Firebase, JUnit, Docker, LaTeX, Vercel, Postman

Certificates: [Databases in mySQL \(Meta\)](#) [Version Control \(Meta\)](#)

EXPERIENCE

Software Engineer Intern

Mar 2025 – Present

Bay FC (NWSL)

San Francisco, CA

- Developed a **Python-based clustering tool** using **KNN** to classify Bay FC players into archetypes, enabling data-driven evaluation by the analytics team
- Cleaned and engineered player features in Python to support KNN clustering and player archetype classification

Software Engineer Intern

Jan 2025 – Present

Santa Clara University (Athletic Department)

Santa Clara, CA

- Built a predictive regression model using **Python** and **scikit-learn**, analyzing strength, athleticism, and efficiency metrics to forecast player performance, enabling data-driven training adjustments for SCU D1 basketball
- Implemented dynamic filtering, KPI tracking, and visualizations using Dash and Plotly, helping coaches assess performance, adjust training, and reduce injury risk based on player data

Software Engineer

Apr 2024 – Dec 2024

Perfect Fit (Startup)

Santa Clara, CA

- Founded and built [Perfect Fit](#), a full-stack virtual wardrobe platform using **HTML**, **React**, **Node.js**, and **Firebase** that generates tailored outfits with smooth data management and scalability
- Created the [Fit Finder](#) swiping feature using React and Firebase to improve outfit suggestions
- Engineered a background removal function using **Node.js** and **Express**, simplifying the clothes uploading process

Software Engineer & Quality Assurance Engineer

Dec 2023 – Mar 2024

Undercurrent.ai (Startup)

San Francisco, CA

- Gained foundational startup experience by writing documentation on **Confluence**, managing and investigating tickets in **JIRA**, and learning the basics of **Git** version control
- Conducted manual tests using **JUnit**, identifying and resolving critical issues such as chatbot messaging errors

PROJECTS

[Trip Planner](#) | *React, Node.js, Vercel, SQL, Google Maps & Places API*

Sep 2024 - Nov 2024

- Developed a full-stack app with real-time itinerary updates and dynamic location suggestions, reducing trip planning time to 15 minutes
- Led development in a team setting using Agile methods, UI mockups, and UML diagrams

[HotSpots](#) | *React, Node.js, Tailwind CSS, Git, Google Maps & INRIX API*

Nov 2023

- Built market intelligence tool to identify optimal business locations using INRIX foot traffic data and Google Maps
- Earned Honorable Mention at INRIX Hackathon for frontend-backend integration and responsive UI design
