EDUCATION

Santa Clara University, B.S. in Computer Science

Jun 2025

Relevant Coursework: Data Structures & Algorithms, Software Design, Object Oriented Programming, Discrete Math, Computer Networks, Operating Systems

Awards & Honors: Bay FC Analytics Program (1 of 10, 2025), SCU Bronco Ventures Accelerator Participant (1 of 30, 2024), [INRIX Hackathon](#) (Honorable Mention, 2023), [Hack4Humanity Hackathon](#) (4th place, 2022)

Extracurriculars: Association of Computing Machinery, Tau Kappa Epsilon Fraternity (Secretary), SCU Varsity Basketball Captain

TECHNICAL SKILLS

Programming Languages: JavaScript, Python, Java, HTML, C++, SQL

Frameworks & Tools: React, Node.js, AWS, Git, CI/CD (GitHub Actions, GitLab, SonarQube), Postman, MongoDB, Jira, JUnit

Certificates: [Databases in mySQL \(Meta\)](#) [Version Control \(Meta\)](#)

WORK EXPERIENCES

Travelers

Hartford, CT

Software Engineer - Engineering Development Program

Jun 2025 – Present

- Refactored CI/CD pipelines in **GitLab** to translate unit test results to **SonarQube**, boosting code coverage from 0% to 50%
- Deployed full-stack analytics dashboards using data from **SQL Server**, **MongoDB**, and **insurance pricing APIs** to deliver real-time premium recommendations for 3000+ analysts
- Enhanced a **Python** backend by adding new rate calculation functions with automated exports to **AWS**, **SQL Server**, and **MongoDB**, reducing manual analyst work by 30%
- Collaborated in **Agile** sprints with product owners and engineering teams to plan features, review requirements, and deliver production-ready enhancements

Bay FC

San Jose, CA

Software Engineer Intern

Mar 2025 – May 2025

- Trained a **K-Nearest Neighbors** machine learning model in **Python** on **National Women's Soccer League (NWSL)** datasets to classify Bay FC players by playing style, enabling coaches to identify similar players and improve tactical planning
- Analyzed the relationship between playing styles and team success across the NWSL, identifying which player archetypes had the strongest correlation with wins

Santa Clara University

Santa Clara, CA

Software Engineer Intern

Jan 2025 – Mar 2025

- Created [NextUp](#), an analytics dashboard to evaluate SCU D1 basketball players, analyzing how strength training metrics and physical measurements impact on-court performance to support player development
- Trained a **logistic regression model** using **Python** and **scikit-learn** on 250+ NCAA D1 players from recent NBA Draft Combines to predict draft probability for SCU players based on key physical measurements and athletic testing metrics

Perfect Fit

Santa Clara, CA

Software Engineer

Apr 2024 – Dec 2024

- Developed [Perfect Fit](#), a virtual wardrobe platform that recommends outfits to users, built with **HTML**, **JavaScript**, and **Firebase**
- Built a background-removal feature using **JavaScript**, improving image quality and reducing processing time by 40%
- Launched a beta to 50+ SCU students, gathering user feedback to improve UI design and add new features

Undercurrent.ai

San Francisco, CA

Software Engineer Intern

Sep 2023 – Dec 2023

- Contributed to a security startup developing encrypted AI tools on Signal for private financial and crypto transactions
- Built Bitcoin wallet features in **Java** using **BitcoinJ** for secure wallet creation, balance tracking, and crypto transfers
- Developed 50+ **JUnit** test cases to verify the accuracy, reliability, and edge-case handling of Bitcoin transactions

PROJECTS

[The Clothes Exchange](#) | MongoDB, Express.js, React, Node.js, Python, ML

Jun 2025

A sustainable fashion marketplace combining my passion for fashion and sustainability through peer-to-peer clothes exchange

- Designed frontend features in **React** and structured **MongoDB** collections to support product browsing, item uploads, and inventory management
- Built a KNN-based machine learning model in **Python** to recommend similar clothing items, enhancing browsing experience
- Architected RESTful API endpoints in **Express.js** to handle login/signup, product listings, and user authentication
