EDUCATION

Santa Clara University, B.S. in Computer Science

Jun 2025

Relevant Coursework: Data Structures & Algorithms, Software Design, Object Oriented Programming, Discrete Math, Computer Networks, Operating Systems

Awards & Honors: Travelers EDP (1 of 50, 2025), Bay FC Analytics Program (1 of 10, 2025), SCU Bronco Ventures Accelerator Participant (1 of 30, 2024), [INRIX Hackathon](#) (Honorable Mention, 2023), [Hack4Humanity Hackathon](#) (4th place, 2022)

Extracurriculars: Association of Computing Machinery, Tau Kappa Epsilon Fraternity (Secretary), SCU Varsity Basketball Captain

TECHNICAL SKILLS

Programming Languages: JavaScript, Python, Java, HTML, C++, SQL

Frameworks & Tools: React, Node.js, AWS, Git, CI/CD (GitHub Actions, GitLab, SonarQube), Postman, MongoDB, Jira, JUnit

Certificates: [Databases in mySQL \(Meta\)](#) [Version Control \(Meta\)](#)

WORK EXPERIENCES

Travelers

Hartford, CT

Software Engineer - Engineering Development Program

Jun 2025 – Present

- Refactored **CI/CD configuration** in GitLab to correctly transmit unit test results to **SonarQube**, boosting code coverage from 0% to 50% and unblocking stalled deployments across all production services
- Deployed **analytics dashboards** using data from **SQL Server**, **MongoDB**, and **pricing benchmark APIs** to deliver real-time premium recommendations for **3000+ analysts**
- Enhanced a **Python** backend by adding new rate calculation functions with automated exports to **AWS S3**, **SQL Server**, and **MongoDB**, reducing manual analyst work by 40%
- Spearheaded an **AI automation** project using **Travelers' internal AI** to group similar system errors, cutting debug time by 60%

Bay FC

San Jose, CA

Software Engineer Intern

Mar 2025 – May 2025

- Developed a **KNN-based clustering** pipeline in **Python** to segment Bay FC players into distinct archetypes, supporting the analytics team with data-driven player evaluation and role classification
- Engineered a reusable **data processing workflow** with built-in quality checks and **Git** version control to ensure consistent, reliable outputs across model iterations

Santa Clara University

Santa Clara, CA

Software Engineer Intern

Jan 2025 – Mar 2025

- Constructed a **machine learning regression model** using **Python** and **scikit-learn** to forecast SCU D1 basketball player performance from physical and performance stats, enabling data-driven training adjustments
- Scraped and processed NCAA basketball statistics using **Python** and **BeautifulSoup** to build a clean, structured dataset of **500+ player records** for model training

Perfect Fit

Santa Clara, CA

Software Engineer

Apr 2024 – Dec 2024

- Created Perfect Fit, a virtual wardrobe platform that recommends outfits to users, built with **HTML**, **JavaScript**, and **Firebase**
- Engineered a **Node.js** and **Express** background-removal service to streamline image uploads, reducing processing time by 40%
- Launched a beta to **50+ SCU students**, gathering user feedback to improve UI design and add new features

PROJECTS

[The Clothes Exchange](#) | MongoDB, Express, React, Node.js, Python, ML

Jun 2025

A sustainable fashion marketplace combining my passion for fashion and sustainability through peer-to-peer clothes exchange

- Architected **RESTful API endpoints** in **Express** to handle login/signup, product listings, and user authentication
- Built a **KNN-based machine learning model** in **Python** to recommend similar clothing items, enhancing browsing experience
- Designed frontend features in **React** and structured **MongoDB** collections to support product browsing, item uploads, and inventory management

[Trip Planner](#) | React, Node.js, Google Maps & Places API, SQL

Sep 2024 – Nov 2024

A travel planning app solving pain points I personally experienced when planning trips across multiple platforms

- Deployed a full-stack app that gives tourists real-time itinerary updates and location suggestions, reducing planning time by 15%
- Integrated **Google Maps & Places API** to pull location data and surface dynamic suggestions for itinerary creation
- Engineered **SQL data storage** to handle user accounts and trip details, powering real-time itinerary updates for **100+ users**
