EDUCATION

Santa Clara University

Santa Clara, CA

Bachelor of Science in Computer Science

Jun 2025

- **Coursework:** Data Structures & Algorithms, Theory of Algorithms, Object Oriented Programming, Discrete Math, Computer Networks, Embedded Systems, Operating Systems
- **Awards & Honors:** Bay FC Analytics Program (Selected Participant, 2025); SCU Bronco Ventures Accelerator (Cohort Member, 2024); INRIX Hackathon (Honorable Mention, 2023); Hack4Humanity Hackathon (4th place, 2022)
- **Extracurriculars:** Association of Computing Machinery, Tau Kappa Epsilon Fraternity (Secretary), Varsity Basketball Captain

TECHNICAL SKILLS

Languages: JavaScript, Python, Java, HTML, CSS, C++, C#, SQL

Libraries/Frameworks: React, Node.js, React Native, Tailwind CSS, AWS

Tools: Git, VS Code, Confluence, JIRA, MongoDB, Firebase, Postman, JUnit, Docker, LaTeX, Vercel

Certificates: [Databases in mySQL \(Meta\)](#) [Version Control \(Meta\)](#)

EXPERIENCE

Software Engineer

Jun 2025 – Present

Travelers

Hartford, CT

- Built cross-platform internal tools with **React** and a **Python/SQL Server** backend to streamline quote comparisons and rate adjustments, impacting pricing decisions for thousands of customers
- Deployed analytics dashboards using **SQL Server**, **MongoDB**, and **pricing benchmark APIs** to deliver premium recommendations and support real-time pricing decisions for analysts

Software Engineer Intern

Mar 2025 – May 2025

Bay FC

San Francisco, CA

- Developed a **clustering tool** using **Python** and **KNN** to classify Bay FC players into archetypes, enabling data-driven evaluation by the analytics team
- Cleaned datasets using **Python** with normalization and feature selection techniques, improving clustering results

Software Engineer Intern

Jan 2025 – May 2025

Santa Clara University

Santa Clara, CA

- Built a **regression model** in **Python** and **scikit-learn** to forecast SCU D1 basketball player performance from physical and efficiency metrics, enabling data-driven training adjustments
- Implemented dynamic filtering, KPI tracking, and visualizations using **Python** and **NumPy**, helping coaches assess performance, adjust training, and reduce injury risk based on player data

Software Engineer

Apr 2024 – Dec 2024

Perfect Fit

Santa Clara, CA

- Founded and built [Perfect Fit](#), a full-stack virtual wardrobe platform using **HTML**, **React**, **Node.js**, and **Firebase** that generates tailored outfits with smooth data management and scalability
- Engineered a background removal function using **Node.js** and **Express**, simplifying the clothes uploading process

TECHNICAL PROJECTS

[The Clothes Exchange](#) | *MERN (MongoDB, Express, React, Node.js), Python*

Jun 2025

- Developed a full-stack online store by implementing **RESTful API endpoints** in **Express** to support login and signup, product listings, and a recommendation system
- Created a similar-item recommendation system using **Python** and KNN Model, resulting in personalized browsing

[Trip Planner](#) | *React, Node.js, Vercel, SQL, Google Maps & Places API*

Sep 2024 - Nov 2024

- Deployed a full-stack app with real-time itinerary updates and location suggestions, reducing trip planning time
- Led Agile team development with system design mockups and a backend-first approach to accelerate production
